Office (310) 423-1220

**Patient Name:** \_\_\_\_\_ **Date:** \_\_\_\_\_

We are trying to learn more about how a voice problem can interfere with your day-to-day activities. On this paper, you will find a list of possible voice-related problems. Please answer all questions based on what your voice has been like over the past two weeks. There are no “right” or “wrong” answers.

Considering both how severe the problem is when you get it, and how frequently it happens, please rate each item below on how “bad” it is (that is, the amount of each problem that you have). Using the following scale for rating the amount of the problem.

- 1 = None, not a problem
- 2 = A small amount
- 3 = A moderate (medium) amount
- 4 = A lot
- 5 = Problem is as “bad as it can be”

### **A Notice to Our Valued Patients**

During your visit in our ENT department, your physician may find it necessary to use endoscopes (special lighted instruments) as part of his evaluation. This will enable your physician to provide you with the most thorough examination of your sinuses and throat when needed. Although, this is fairly routine for our specialty, most insurance companies consider this a “Surgery” or “In- office Procedure” and it may be reflected as such on your billing statement or explanation of benefits. In addition, your physician may also require you to have an Audiogram, also known as a hearing test. Each of these services will result in an additional charge and therefore an additional financial responsibility for you. We want you to be informed of these services so there are no surprises or concerns after you leave our office.

Please sign below to acknowledge that you received the office notification regarding office Endoscopies/Audiograms and are aware that it may be performed during your visit.
